

Help make Toronto a Smarter City

Let's work together to solve some of Toronto's challenges

The City of Toronto is participating in the Government of Canada's Smart Cities Challenge. The Challenge invites cities, regions and Indigenous communities across Canada to submit ideas and innovative solutions to address important local issues. The City is looking for creative ways to solve Toronto's complex issues using data and technology, and will be competing against other large cities for \$50 million to fund the implementation of the winning idea.

How you can help: Think Big!

You are invited to participate in one of five workshops hosted by Toronto Public Library, in support of the City of Toronto's Smart Cities Challenge proposal. You will be part of a small group who will learn more about the Smart Cities Challenge, and then discuss and brainstorm the big issues in your communities and Toronto and possible solutions.

Event Details

Where: Malvern Branch, 30 Sewells Road

When: Wednesday, January 17, 5:30 – 8:30 pm

Issues your group will be exploring:

1. Security

Feeling and being safe in neighbourhoods

2. Mobility

Addressing unemployment and increasing the number of quality jobs in Toronto

To let us know if you will be attending, or for more information about the workshops, call or email the branch at:
